

To Whom it may Concern,

Janet Hoff worked with me at the Downriver Animal Hospital for 7 years. She was an excellent technician. When frightened animals needed restraint, Janet was able to calm them with her relaxed demeanor, which allowed many diagnostics to be performed without sedation.

She was also very good communicating with clients and educating them about different diseases and problems. Her ability to listen and seek solutions to their questions, put clients at ease. Technically, Janet always excelled at running diagnostics tests, placing catheters, performing dentals, etc.

I really enjoyed the years I spent working with Janet. If you have any further questions, please don't hesitate to call.

Sincerely,

Rene' J. Deptula, D.V.M.
